

ADAPTIVE ANALYSIS TECHNIQUE FOR
PLANNING OFFICE LAYOUT

ABSTRACT OF THE DISCLOSURE

5 A computer method for enhancing office layout. The method includes the
steps of providing a requirements database comprising a compendium of office
requirements history; providing an office database comprising a compendium of
at least one of office layout solutions, office information, and office diagnostics;
and, employing an adaptive analysis technique for interrogating the requirements
and office databases for generating an output data stream, the output data
10 stream correlating office requirements with office layout solution.
